Description:

Balanced Choice Health Care, Inc., proposes a program for assuring that all Coloradans have comprehensive, quality, accessible, and affordable health care. By eliminating wasteful administrative expense, the Colorado Balanced Choice Program could eventually lower Colorado per capita health care expenses and limit the financial burden on employers, while still maintaining a vital marketplace for providers. Balanced Choice would gradually convert Colorado to a single-risk-pool program that has a balancing mechanism for combining the security of a traditional single payer plan with a plan that is responsive to market forces.
